ESLAM HEGAZY

Senior Mobile Engineer — Flutter | Android | iOS

Cairo, Egypt | eslamhegazy968@gmail.com | +20 101 921 1216 | github.com/eslam-hegazy | linkedin.com/in/eslam-hegazy-08223a1b7

PROFESSIONAL SUMMARY

Senior Mobile Engineer with 4+ years of experience designing and delivering scalable, high-performance Flutter applications across FinTech, Healthcare, Logistics, and E-Commerce domains. Proven expertise in Clean Architecture, MVVM, BLoC state management, RESTful API integration, CI/CD pipelines, and mobile security (SSL Pinning, ProGuard, JWT, Biometric Authentication). Experienced engineering team lead with a strong track record of mentoring developers, driving architectural decisions, and shipping production-grade Android & iOS applications used by thousands of users. Proficient in leveraging AI-assisted development tools (including LLMs such as Claude and ChatGPT) to accelerate delivery, improve code quality, and reduce time-to-market. Also brings hands-on backend integration experience (Java Spring Boot) to support seamless API collaboration.

TECHNICAL SKILLS

Languages: Dart, Java, Kotlin, JavaScript, Swift

Mobile Frameworks: Flutter (iOS & Android), Kotlin (Android Native), Swift (iOS Native)

Architecture & Patterns: Clean Architecture, MVVM, BLoC, Provider, Riverpod, Repository Pattern, SOLID Principles, Design Patterns

State Management: BLoC / Cubit, Provider, Riverpod, GetX

Mobile Security: SSL Pinning, Certificate Pinning, Flutter Obfuscation, ProGuard/R8, Secure Storage, JWT, Biometric Authentication

APIs & Integration: RESTful APIs, GraphQL, JWT Authentication, OAuth2, WebSockets, Firebase Cloud Messaging (FCM)

Databases & Storage: MySQL, PostgreSQL, Firebase Firestore, MongoDB, SQLite, Hive, SharedPreferences

Testing & Quality: Unit Testing, Widget Testing, Integration Testing, TDD, Clean Code, Code Review

DevOps & CI/CD: Git, GitFlow, GitHub Actions, Azure DevOps, CI/CD Pipelines, Fastlane, Docker, Jira

Cloud & Services: Firebase (Auth, Firestore, Storage, FCM, Crashlytics), AWS (EC2, S3 — basic level)

Payment Integrations: HyperPay, Fawaterk, PayTabs, Stripe (integration)

AI-Assisted Development: Claude (Anthropic), ChatGPT, GitHub Copilot — prompt engineering, code generation, review automation

Methodologies: Agile / Scrum, Sprint Planning, Backlog Refinement, Technical Mentoring, Cross-functional Team Leadership

WORK EXPERIENCE

Senior Mobile & Backend Developer (Flutter | Java Spring Boot) — Beshara Group Jun 2025 – Present

- Architected and led development of enterprise-grade Flutter applications serving 1,000+ clients, improving system throughput by **35%** through optimized API calls, caching strategies, and efficient state management.
- Owned end-to-end architectural decisions related to scalability, security, performance, and code maintainability using Clean Architecture and SOLID principles.
- Mentored junior and mid-level developers through structured code reviews, pair programming, and technical guidance, reducing bug rate by **25%**.
- Directed Agile sprint planning and backlog refinement across cross-functional teams, achieving **95% sprint completion rate**.
- Collaborated with backend teams to design and integrate scalable RESTful APIs using Java Spring Boot, ensuring seamless mobile-backend communication.
- Utilized AI-assisted development tools (**Claude, GitHub Copilot**) to accelerate feature delivery and automate code review workflows.

Senior Flutter Developer — National Technology Jun 2024 – Jun 2025

- Built and maintained production Flutter applications for healthcare domain supporting **1,000+ active users**, focused on HIPAA-aligned data security and system scalability.
- Reduced technical debt by **20%** through mobile architecture refactoring, adopting Clean Architecture, and enforcing strict code quality standards.
- Improved application stability by **50%**, cutting crash rates via strengthened error handling, Crashlytics monitoring, and proactive performance optimization.

Mid-level Flutter Developer — RunProf LLC Feb 2023 – Jun 2024

- Developed **5+** scalable cross-platform mobile applications integrating GraphQL and Kotlin-based Android solutions.

- Achieved **40% improvement** in app efficiency through optimized API calls, local caching (Hive/SQLite), and lazy loading techniques.
- Implemented OAuth2 and JWT authentication flows, improving security compliance across all mobile products.
- Backed feature delivery with unit, widget, and integration test coverage, achieving **90% on-time delivery** rate.

Junior Flutter Developer — Alareeb Information & Communication Company Feb 2022 – Feb 2023

- Integrated **HyperPay** payment gateway into Flutter mobile applications, implementing PCI-DSS-aligned secure transaction handling.
- Reduced application load times by **35%** through mobile performance optimization and efficient REST API design.
- Delivered **2 custom** enterprise mobile applications end-to-end, from UI/UX implementation through App Store & Google Play deployment.

PROJECTS

- Shamy Store LLC (Gaming E-Commerce) — Flutter e-commerce platform with real-time inventory tracking, push notifications, and secure payment integrations (Fawaterk, PayTabs). Google Play | App Store
- CSC KW — Kuwait Civil Service Commission (Government) — Flutter app providing 10,000+ government employees with real-time access to official announcements, news, and job-related services. Google Play | App Store
- ElMatches (Sports / Fan Engagement) — Flutter sports app for fan ratings, predictions, player/coach opinions, and live match discussion features. Google Play | App Store
- Hwaidak Hotels — Titanic Group (Hospitality) — Flutter hotel booking app for Titanic resorts in Hurghada, with seamless reservations and personalized guest experience features. Google Play | App Store
- Smou Care (Healthcare) — Flutter healthcare app for lab result delivery, home-visit booking, branch locator, and real-time service tracking. Google Play | App Store
- MindScape Therapy (Mental Health) — Flutter psychotherapy app with end-to-end encrypted consultations connecting users with licensed therapists. Google Play | App Store
- Drug Deal (Medical Reference) — Flutter medical encyclopedia app featuring AI-powered drug interaction detection and alternative medication suggestions. Google Play | App Store
- iTO Captain (Ride-Hailing & Delivery — Driver App) — Flutter driver app supporting car, motorcycle, and truck operations with real-time GPS tracking and earnings management. Google Play
- iTO (Ride-Hailing & Logistics) — Flutter ride-hailing and logistics app with real-time trip tracking, flexible payments, and furniture-moving logistics. Google Play | App Store
- Egyptian Greece (Community Platform) — Flutter community app with real-time notifications, secure API integrations, and QR-based visitor access control. Google Play | App Store
- Puricom Egypt (Water Purification) — Flutter app for QR/serial product verification, service booking, and client account management. Google Play | App Store
- Home Food Plus Captain (Food Delivery — Driver App) — Flutter driver app with order tracking, transparent earnings dashboard, and real-time delivery status updates. Google Play | App Store
- Royal Link (Healthcare) — Flutter medical platform connecting labs, medical centers, and hospitals with high-volume data exchange and optimized DB performance. Google Play | App Store

EDUCATION

Bachelor of Computer Science — Kafr El-Sheikh University

Graduated 2023 · Grade: Good
