ESLAM HEGAZY

Senior Software Engineer — Java | Spring Boot | Backend Systems

Cairo, Egypt | eslamhegazy968@gmail.com | +20 101 921 1216 | github.com/eslam-hegazy | linkedin.com/in/eslam-hegazy-08223a1b7

PROFESSIONAL SUMMARY

Senior Software Engineer with 4+ years designing and building scalable, secure backend systems using Java, Spring Boot, Spring Security, and Spring Data JPA/Hibernate across FinTech, Healthcare, Logistics, and E-Commerce. Experienced architecting RESTful APIs and microservices, implementing JWT/OAuth2 authentication and authorization, and optimizing performance with Redis caching and message-driven systems (Kafka, RabbitMQ) on MySQL, PostgreSQL, and MongoDB. Strong background in Clean Architecture, SOLID principles, TDD, CI/CD (Docker, GitHub Actions), and mentoring engineers within Agile/Scrum teams. Proficient in leveraging AI-assisted development tools (Claude, ChatGPT, GitHub Copilot) to accelerate delivery and improve code quality. Also brings hands-on mobile development experience (Flutter) for close collaboration with client-facing teams.

TECHNICAL SKILLS

Languages: Java, Kotlin, JavaScript

Backend Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate

Architecture & Design: RESTful API Design, Microservices Architecture, Clean Architecture, Design Patterns, SOLID Principles, TDD

Security: JWT Authentication & Authorization, OAuth2, Spring Security, HIPAA Compliance, PCI-DSS Standards

Messaging & Caching: Apache Kafka, RabbitMQ, Redis

Databases: MySQL, PostgreSQL, MongoDB

API Documentation: Swagger / OpenAPI

Testing: JUnit, Mockito, TDD, Clean Code, Code Review

DevOps & Tools: Docker, GitHub Actions, CI/CD Pipelines, Git, Linux, Jira

Cloud: AWS (EC2, S3 — deployment & hosting, basic level)

Payment Integrations: HyperPay, Fawaterk, PayTabs

AI-Assisted Development: Claude (Anthropic), ChatGPT, GitHub Copilot — prompt engineering, code generation, review automation

Mobile Development (Secondary): Flutter, Dart, Kotlin, Swift — cross-functional collaboration with mobile teams consuming backend APIs

WORK EXPERIENCE

Senior Software Engineer — Beshara Group Jun 2025 – Present

- Architected and implemented RESTful Spring Boot backend APIs consumed by enterprise Flutter applications serving 1,000+ clients, improving system throughput by **35%** through Redis caching, query optimization, and connection pooling.
- Led architecture decisions, code reviews, and **TDD** practices for Java Spring Boot services, mentoring engineers on Clean Architecture, SOLID principles, and Authorization best practices.
- Directed Agile sprint planning and backlog refinement across cross-functional teams, achieving a **95%** sprint completion rate.
- Utilized AI-assisted development tools (**Claude, GitHub Copilot**) to accelerate feature delivery and automate code review workflows.

Senior Software Engineer — National Technology Jun 2024 – Jun 2025

- Built and maintained Spring Boot backend services for **HIPAA-aligned** healthcare applications supporting **1,000+ active users**, focused on data security, authorization, and system scalability.
- Reduced technical debt by **20%** through backend architecture refactoring and adoption of Clean Architecture and **TDD** patterns.
- Improved application stability by **50%**, cutting crash rates via strengthened API error handling, authorization controls, and monitoring.

Senior Software Engineer — RunProf LLC Feb 2023 – Jun 2024

- Implemented JWT authentication and OAuth2-based authorization across backend services, improving security compliance by **30%**.
- Reduced backend response times by **35%** through query optimization, Redis caching, and connection pooling.
- Designed RESTful APIs supporting product features driving a **25%** increase in user engagement.
- Collaborated with product and QA teams using **TDD** with JUnit/Mockito test coverage, achieving **90%** on-time delivery.

Software Engineer — Alareeb Information & Communication Company Feb 2022 – Feb 2023

- Integrated **HyperPay** payment gateway into Spring Boot backend services with **PCI-DSS-aligned** secure transaction handling.
- Reduced application load times by **35%** through backend optimization, connection pooling, and efficient database query design.
- Delivered **2 custom** backend-driven applications for enterprise clients, from API design and authorization through deployment.

PROJECTS

- Shamy Store LLC (Gaming E-Commerce) — Architected backend APIs for real-time inventory tracking and integrated secure payment gateways (Fawaterk, PayTabs). Google Play | App Store
- CSC KW (Government — Kuwait Civil Service Commission) — Built backend APIs delivering real-time announcements, news, and job-related services to 10,000+ employees. Google Play | App Store
- ElMatches (Sports / Fan Engagement) — Developed backend services powering fan ratings, predictions, and live match discussion features. Google Play | App Store
- Hwaidak Hotels — Titanic Group (Hospitality) — Built Spring Boot backend APIs for hotel reservations and guest personalization for Titanic resorts in Hurghada. Google Play | App Store
- Smou Care (Healthcare) — Developed HIPAA-aligned backend services for lab result delivery, home-visit booking, and branch locator features. Google Play | App Store
- MindScape Therapy (Mental Health) — Implemented encrypted backend APIs with end-to-end security connecting users with licensed therapists. Google Play | App Store
- Drug Deal (Medical Reference) — Built backend logic for drug-interaction detection, authorization control, and alternative medication suggestions. Google Play | App Store
- iTO Captain (Ride-Hailing & Delivery — Driver App) — Developed backend services supporting car, motorcycle, and truck driver operations for passenger and goods transport. Google Play | App Store
- iTO (Ride-Hailing & Logistics) — Designed scalable backend services for real-time trip tracking, flexible payment processing, and furniture-moving logistics. Google Play | App Store
- Egyptian Greece (Community Platform) — Delivered secure API integrations with JWT authorization and real-time notifications for QR-based visitor access. Google Play | App Store
- Puricom Egypt (Water Purification) — Built backend APIs for QR/serial product verification, PCI-DSS-aligned service booking, and client account features. Google Play | App Store
- Home Food Plus Captain (Food Delivery — Driver App) — Implemented backend modules for real-time order tracking and payment transparency for delivery drivers. Google Play | App Store
- Royal Link (Healthcare) — Built secure APIs for lab-to-hospital data exchange with HIPAA-aligned authorization and optimized DB performance for high-volume transactions. Google Play | App Store

EDUCATION

Bachelor of Computer Science — Kafr El-Sheikh University

Graduated 2023 · Grade: Good

LANGUAGES

Arabic (Native) | English (Professional Working Proficiency)
